muthuprofolio.vercel.app

Experienced Flutter Developer with 6+ years of hands-on experience in designing, developing, and deploying cross-platform mobile applications for Android and iOS. Across roles in three organizations, primarily focused on Flutter (Dart) development with a strong emphasis on clean architecture and performance optimization. Skilled in state management (Bloc, Provider & GetX) and experienced in working with .NET Core and PHP-based APIs, including understanding and creating basic API endpoints.

Proficient in JavaScript, HTML, CSS, and MySQL (basic) for supporting full-stack workflows. Recognized for problem-solving, team collaboration, and delivering scalable, high-quality mobile apps in agile environments. Passionate about clean code, continuous learning, and user-focused development.

Skills

Programming Languages: Dart, JavaScript

Frameworks & Libraries: Flutter, React.js, Vue.js, React Native, .NET Core

Web Technologies: HTML5, CSS3

State Management & Architecture: Provider, Bloc, MVVM, MVC

Databases: MySQL (Basic)

Tools & IDEs: Visual Studio Code, Android Studio, Xcode

Source Control: Git, GitHub, GitLab, Azure DevOps

CI/CD & Automation: GitHub Actions

Enterprise & Collaboration Tools: Jira, Postman, Swagger, SharePoint Tracker, ClickUp

Experience

Touchmark Descience - Chennai (October 2023 – May 2026) as Flutter Developer

- Developed and maintained mobile applications and REST APIs, ensuring high performance and reliability.
- Optimized application performance, reducing load times and improving user experience.
- Implemented user authentication using Firebase and developed a social media application using Agora.
- Designed and developed applications using GetX and Bloc architectures for scalable and maintainable code.
- Created custom reusable widgets to enhance modularity and maintainability of the apps.
- Delivered user-ready builds through version-controlled deployment pipelines.
- Managed multiple mobile applications for the company, including development, maintenance, and updates.
- Developed offline-capable applications to ensure seamless functionality without internet connectivity.

Neophron Technologies - Erode (July 2022 – August 2023) as Project Engineer

- Developed an e-commerce mobile application using Flutter, including seamless payment gateway integration with Stripe and Razorpay.
- Collaborated with the team to design, develop, and maintain Flutter mobile applications.
- Worked collaboratively on a client application using Vue.js, contributing to development, maintenance, and code quality
- Led the technical aspects of the team, providing guidance, code reviews, and support to team members.
- Actively contributed to team collaboration, problem-solving, and project delivery across mobile and web platforms.

Qantler Technologies - Chennai (November 2019 – July 2022) as a Software Developer

- Learned and applied Flutter, React.js, and .NET Core Web API to develop web and mobile applications.
- Participated in requirement analysis, feature development, and client discussions to ensure project alignment.
- Collaborated with QA and DevOps teams to streamline release cycles and maintain high-quality deliverables.
- Provided post-deployment support, fixed bugs, and assisted team members with project challenges.
- Used Azure Repository for version control and efficient code management.
- Developed mobile applications, backend services, and frontend components, contributing to end-to-end project delivery.

Project Experience

Zenro – Smart Attendance Tracker | *Flutter Developer*

- ❖ Developed a smart attendance tracker with optional background location access.
- ❖ Implemented geofenced clock-in/out, automated reminders, and privacy-conscious tracking.
- ❖ Tools: Flutter, Firebase
- ❖ Play Store: [Link](#)

Rupini's (Spa) | *Flutter Developer*

- ❖ Built a holistic beauty and bridal services application emphasizing wellness and user experience.
- ❖ Tools: Flutter, Firebase
- ❖ Play Store: [Link](#)

AllyCarto (User & Manager App) | *Flutter Developer*

- ❖ Developed an e-commerce platform for local shops to accept online orders without extra investment.
- ❖ Tools: Flutter, Firebase

TaskTrak Live (UK) | *Flutter & React Developer*

- ❖ Developed a lean management and project tracking application to enhance operational performance.
- ❖ Tools: Flutter, React & Firebase
- ❖ Play Store: [Link](#)
